

Connecting Data

STRUGGLING WITH MAKING DATA CONNECTIONS? LET CHALKABLE HELP MAKE THE MOST OF THE TOOLS YOU HAVE!

Dashboard views within the InformationNOW framework contain new tools to allow users to view detailed data in multiple ways with the ultimate goal of drilling down on student performance in the classroom and correlates it to formative and summative data.

Chalkable provides services to schools to empower all stakeholders to successfully respond to student needs related to improvement. Chalkable Instructional Coaches work with school and district personnel to build the capacity for:

- consistent data collection,
- understanding key data factors, and
- using the tools within the system make decisions for **curriculum** and **instruction, intervention, attendance, discipline** and individual **student achievement**.

Services also include the creation of test templates and importing of various 3rd party and high-stakes assessment data into the InformationNOW portal so that data can be filtered by sub-groups thus giving educators the resources to make instructional decisions based on the trends that appear in the analyzed data sets.

Chalkable professional development services are intended to provide educators with the skills to become more data savvy and to serve as the foundation for well-directed, measurable change in each school.
